

Fire Competence for Building Safety Managers

C10

Your 3-day guide to managing your legal maintenance requirements for fire safety.

Overview

This course is designed to explain key fire safety issues and procedures relevant to facilities and building managers. It also details maintenance regimes and responsibilities for fire safety systems in occupied premises.

Who will benefit?

- maintenance staff
- facility managers
- occupational workplace advisers
- health and safety managers/consultants/officers
- estate managers
- service engineers

Learning outcomes

- an understanding of fire hazards in the workplace and their associated risks
- knowledge of the fire safety related equipment and facilities which assist in mitigating these risks – from protected means of escape to fire alarm and detection systems and sprinkler systems
- knowledge of the current standards and codes of practice which relate to these facilities and the detailed maintenance regimes which apply
- improved understanding of the fire risk assessment process

Programme

- identification of the major causes of fire
- compartmentation and means of escape
- fire doors and glazing
- automatic fire alarms and detection systems
- emergency lighting
- portable firefighting equipment
- automatic suppression systems
- maintenance and record keeping
- staff training
- fire risk assessment
- risers and hydrants

Certification

- Fire Protection Association (FPA) Certificate
- This course has been awarded 18 IFE CPD hours

Progression

- CFFPA Europe Level 5 Diploma in Fire Prevention: Technical Cycle – page 22
